piaMobile

YOUR PRODUCTION AT A GLANCE, ANYTIME, ANYWHERE

Accessing production data on the go has never been easier. pia-Mobile connects seamlessly to one or multiple production lines, delivering all relevant information from the IAS directly to your smartphone in a clear and intuitive format. The real-time dashboard provides key KPIs such as OEE or parts produced, while smart push notifications instantly inform you about faults, threshold exceedances, or technical issues.

Users gain a comprehensive overview of all stations, including detailed insights into performance, production trends, and pending messages. piaMobile increases flexibility in monitoring and analysis, reduces downtime through early alerts, and saves valuable time by enabling fast, data-driven decisions-anytime, anywhere.

TARGET GROUP

Production managers | Maintenance

KEY-FEATURES

Real-time notifications and KPIs on smartphone

ADVANTAGES

- Quick overview of the condition of one or more production lines
- Increased flexibility in monitoring and analyzing production, regardless of location
- Reduced risk of downtime thanks to early notifications and fast response times

AT A GLANCE

- Dashboard with real-time KPIs such as OEE and parts produced
- Push notifications in the event of faults, cycle time or sensor value thresholds exceeded, and much more
- Production line overview with all stations and their specific KPIs
- Detailed information on the individual stations, such as cycle times
